

Find Your Ring Size

1. Use an existing ring that fits you perfectly on the desired finger when your hands are warm. Ideally, you want to be using a ring with a similar band width.
2. Start by printing this Ring Sizing Chart onto an A4 sheet of paper making sure that the printer options are set to 'print to actual size'. Do not click 'scale to fit' or 'fit to 100%'. Check that the sizing guide has printed correctly by measuring the line at the bottom of the page. It should measure exactly 10cm. If not, check your printer settings and try again.
3. Place your ring over the circles below and match the inside edge of the ring to the circle closest in size.
4. Only use the adjustment table below if the band width of your existing ring and the Design Bay ring are not similar.

		Design Bay Ring	
		Narrow Band	Wide Band
Your Existing Ring	Narrow Band	Order your measured ring size	Order 1 size bigger than your measured ring size
	Wide Band	Order ½ size smaller than your measured ring size	Order your measured ring size
